

Good Driver Incentive

Good Driver Incentive

Rewarding responsible behaviour, and saving lives on the road.

.....

A new Liberal Government will put driver incentives on the table for young motorists to reward responsible behaviour and help save lives.

We know young drivers are consistently overrepresented in the road toll because of their inexperience behind the wheel or on a motorcycle.

The Liberal Party policy would reward provisional drivers who achieve three years of offence free driving by covering the cost of a full licence renewal in the following year, saving them \$71.

A new Liberal Government will also invest \$1 billion over four years into road maintenance, boosting the safety of our roads for all road users.

There is nothing more important than saving lives and reducing serious injuries on our roads.

This is part of our plan for safer suburbs and stronger communities, and a more affordable South Australia.
